

AC Carriage Drives

- High Efficiency
- Low Maintenance
- Digital Control System
- Clean Energy Regeneration
- Modular Controller for Easy Serviceability
- Superior Drive Performance
- Fully Supported Cable Drum, No Overhung Loading
- Ultimate in Safety, Utilizing a Failsafe Disc Brake System

The Salem Equipment AC carriage drive is a complete system including a high performance AC induction motor coupled to a gear reducer driving a cable drum, all mounted on a common steel base. The state-of-the-art control system consists of a flux vector drive controller working in conjunction with a Programmable Logic Controller (PLC) to provide maximum flexibility and performance.

A no-nonsense operator control/status panel and heavy-duty control handle round out the package as truly being designed for the sawmill environment. The system is designed to provide high production, quick responsiveness, energy efficiency and ease of maintenance.

Serving the Forest Products Industry Worldwide Since 1946
