

Salem Edgers

- “Nearly bullet-proof” construction preferred by filers to maintain alignment
- Custom designed for your mill application
- Top arbor, climb cut or bottom arbor, power cut
- Oversized door hardware for improved bearing life
- High recovery gangs - thin saws, precision guides, and splined arbors
- Lineal or transverse scanning to fit mill flow
- Special Hardwood scanning applications
- Worry-free outfeed pickers to route product
- Optimized recovery with wiggle saw box
- High piece counts

Salem has an edger system for any sawmill application.
